About Me

I am a highly motivated and results-driven professional with a Bachelor of Science in Management Information Systems (MIS). My academic journey has equipped me with a comprehensive understanding of both business and technology, enabling me to effectively analyze, design, and implement IT solutions that support organizational objectives.

I possess a strong foundation in systems analysis, database management, software development, IT project management, and project management.

Through various hands-on projects and coursework, I have honed my problem-solving abilities.
